## EDUCATION

**Napier University**  
*BEng Software Engineering*

Edinburgh, UK  
*Sep 2016 - May 2020*

## SOFTWARE ENGINEERING PROJECTS

**Honours Project**  
*Undergraduate Research*

Edinburgh, UK  
*Sep 2019 - April 2020*

- Supervisor: Dr. Andreas Steyven
- Project title: Development of an IoT device in order to visualise and monitor indoor noise pollution.
- The development board and sensor for device were programmed in C language. For persistent data storage, MySQL database was created within the Google Cloud Platform. MiT app inventor was used for the implementation of an Android Application. The device was sending sound-readings from a closed environment, storing the measurements within the database and automatically visualizing the readings in Ubidots dashboard.

## TECHNICAL SKILLS

**Programming Language**: C (proficient), C# (proficient), Java (proficient)  
**Software Engineering Related Skills**: HTML, CSS, JavaScript, Node-JS, Bootstrap, MySQL Database Systems, Linux, MS Office, LaTeX, Android Studio, WordPress, Arduino, micro-controllers, micro-Python

## ADDITIONAL EXPERIENCE

**Uber Technologies, Inc**  
*Uber Driver*

Edinburgh, UK  
*Feb 2019 - April 2020*

**Mallouppas & Papacostas Ladies and School Bags, LTD**      Nicosia, Cyprus  
*Courier/Warehouse Assistant*      *June 2017 - August 2017*  
*Courier/Warehouse Assistant*      *May 2018 - August 2018*  
*Courier/Warehouse Assistant*      *June 2019 - August 2019*

- Transportation, storage and display of school bags in supermarkets and retail stores.
