EDUCATION

Napier University   Edinburgh, UK
BEng Software Engineering   Sep 2016 - May 2020

SOFTWARE
ENGINEERING
PROJECTS

Honours Project   Edinburgh, UK
Undergraduate Research   Sep 2019 - April 2020

- Supervisor: Dr. Andreas Steyven
- Project title: Development of an IoT device in order to visualise and monitor indoor noise pollution.
- The development board and sensor for device were programmed in C language. For persistent data storage, MySQL database was created within the Google Cloud Platform. MiT app inventor was used for the implementation of an Android Application. The device was sending sound-readings from a closed environment, storing the measurements within the database and automatically visualizing the readings in Ubidots dashboard.

TECHNICAL
SKILLS

HTML, CSS, JavaScript, Node-JS, Bootstrap, WordPress, MySQL Database Systems, C, C#, Java, Android Studio, Linux, MS Office, LaTeX, Arduino, micro-controllers, micro-Python, GitHub, Agile
